LIST OF CONTENTS

Number 1

W. G. Waters II	iii	Editorial
Kenneth E. Train, William B. Davis and Mark D. Levine	1	Fees and rebates on new vehicles: impacts on fuel efficiency, carbon dioxide emissions, and consumer surplus
Mark Wardman	15	Inter-urban rail demand, elasticities and competition in Great Britain: evidence from direct demand models
Anming Zhang and Derek Aldridge	29	Effects of merger and foreign alliance: an event study of the Canadian airline industry
Germà Bel	43	Changes in travel time across modes and its impact on the demand for inter-urban rail travel
Theodore P. Stank and Patricia J. Daugherty	53	The impact of operating environment on the formation of cooperative logistics relationships
Paul R. Murphy, James M. Daley and Patricia K. Hall	67	Carrier selection: do shippers and carriers agree or not?
R. Stephen Parker, Heather Fletchall and Charles. E. Pettijohn	73	Truck operators' perspectives on use of alternative fuels

Number 2

Pablo Coto-Millán, José Baños-Pino and Vicente Inglada	79	Marshallian demands of intercity passenger transport in Spain: 1980–1992. An economic analysis
Sock-Yong Phang and Rex S. Toh	97	From manual to electronic road congestion pricing: the Singapore experience and experiment
Greg M. Lepak	107	Airline deregulation and the impact on stock prices of major surviving carriers
Jean-Daniel Rolle	117	Estimation of Swiss railway demand with computation of elasticities
Alexander E. Ellinger, Patricia J. Daugherty and Craig M. Gustin	129	The relationship between integrated logistics and customer service
Simran K. Kahai and Jon M. Ford	139	Economics of intrastate trucking regulation: some empirical evidence
Manolis G. Kavussanos and Stelios N. Marcoulis	147	The stock market perception of industry risk and micro-economic factors: the case of the US water transportation industry versus other transport industries

Number 3

Jane N. Feitler, Thomas M. Corsi and Curtis M. Grimm	159	Measuring firm strategic change in the regulated and deregulated motor carrier industry: an 18 year evaluation
Chandrasekhar Das and Rajesh Tyagi	171	Role of inventory and transportation costs in determining the optimal degree of centralization
Jong-Hun Park	181	The effects of airline alliances on markets and economic welfare
Paul Hooper	197	Liberalising competition in domestic airline markets in Asia—the problematic interface between domestic and international regulatory policies
James C. McElroy, Paula C. Morrow and Michael R. Crum	211	Organizational and union commitment among railroad employees
Ki-Chan Nam	223	A study on the estimation and aggregation of disaggregate models of mode choice for freight transport
A. Athanasenas	233	Traffic simulation models for rural road network management

Number 4

SPECIAL ISSUE

AIRPORT PERFORMANCE MEASUREMENT AND AIRPORT PRICING

David Gillen and W. G. Waters II	245	Introduction
P. G. Hooper and D. A. Hensher	249	Measuring total factor productivity of airports—an index number approach
David Gillen and Ashish Lall	261	Developing measures of airport productivity and performance: an application of data envelopment analysis
Eric Pels, Peter Nijkamp and Piet Rietveld	275	Substitution and complementarity in aviation: airports vs airlines
Anming Zhang and Yimin Zhang	287	Concession revenue and optimal airport pricing
Peter Forsyth	297	Price regulation of airports: principles with Australian applications
Aisling J. Reynolds-Feighan and Kieran J. Feighan	311	Airport services and airport charging systems: a critical review of the EU Common Framework
Roberto Rendeiro Martín-Cejas	321	Airport pricing systems in Europe and an application of Ramsey pricing to Spanish airports
